Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 6-14, drawn to a semiconductor process, classified in class 438, subclass 345.24.
- II. Claims 1-5, drawn to a semiconductor processing apparatus, classified in class 156, subclass 345.24.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP§ 806.05(e)). In this case, the process can be practiced by another and materially different apparatus such as using a liquid cooling element instead of a flow switch.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
